Military Information from Sofia

1. An unidentified tank unit is located in barracks at Liberty Park on a street which branches off the Derven Road. The barracks were formerly occupied by the Germans. The unit is equipped with an undetermined number of tanks. they are smaller than the T-34 and had heard that they were Krupp 27-ton tanks. The following is a sketch of the barracks area: 25X1

2. A military academy is located in Sofia in the area between Misia Street and Sultan Hill Street, bordering Klement Gottwald Street (formerly Evlogi Georgiev Street and formerly Adolph Hitler-Benito Mussolini Street). During the last two years the academy has been enlarged by the construction of two or three buildings. The following sketch shows the location of the academy in Sofia:

3. an artillery major named Petkov who is serving in the Ministry of Defense. 25X1

Factories in Karnobat

4. An oil factory, formerly the property of the Dragunov Brothers, is located in the eastern outskirts of Karnobat (N 42-39, E 27-00), on the road to Aytos. It consists of several sheds which are located around the principal 2- or 3-story building. Four or five chimneys rise above the main building. The factory employs 300-400 workers in three shifts per day and produces an unknown amount of edible sunflower seed oil to supply national needs. The oil is sold through the State stores.
5. A small metallurgical factory, formerly the property of the Salomoni Brothers who have emigrated to Israel, is located in the western outskirts of Karnobat on the road to Sliven. The factory consists of one pavillion approximately 80 by 25 meters in size and one shed approximately 25 by eight meters in size which was constructed in 1950 and has a single-slope roof. The factory is enclosed by a wooden picket fence. Tanyu (fnu) is the factory director. Approximately 40 workers are employed. Production consists of iron stoves and ranges, stove-pipes and elbows; metal containers for pharmaceutical products and vaseline, various metal containers for canning, and pails, cans, etc. of galvanized metal, for Bulgarian use. Raw materials are obtained from Sofia, probably from the depots of the Ministry of Industry. The factory has the following equipment: one metal press, one metal slicer, rollers, one furnace for polishing the metal, four "Kordon" machines for edging the metal, and one machine for making screw plugs for cans.
6. A mill for grinding grain is under construction in the vicinity of the oil factory described in paragraph 4. This mill is one story high.
7. A State mill of great importance is located in the vicinity of the railroad station of Karnobat. This mill was a State enterprise even before World War II.
